Ellington Residential Mortgage REIT Reports First Quarter 2019 Results

OLD GREENWICH, Connecticut—May 2, 2019

Ellington Residential Mortgage REIT (NYSE: EARN) (the "Company") today reported financial results for the quarter ended March 31, 2019.

Highlights

- Net income of \$8.9 million, or \$0.72 per share.
- Core Earnings¹ of \$2.4 million, or \$0.19 per share, and Adjusted Core Earnings¹ of \$3.3 million, or \$0.27 per share.
- Book value of \$12.69 per share as of March 31, 2019, which includes the effect of a first quarter dividend of \$0.34 per share.
- Net interest margin of 0.83%, and adjusted net interest margin² of 1.08%.
- Weighted average constant prepayment rate for the fixed-rate Agency specified pool portfolio of 6.0%.
- Dividend yield of 11.7% based on the May 1, 2019 closing stock price of \$11.66.
- Debt-to-equity ratio of 9.0:1 as of March 31, 2019; adjusted for unsettled purchases and sales, the debt-to-equity ratio was 8.9:1.
- Net mortgage assets-to-equity ratio of 8.5:1³ as of March 31, 2019.

First Quarter 2019 Results

"During the first quarter, Ellington Residential generated net income of \$0.72 per share and an economic return of 5.93%, or almost 26% annualized," stated Laurence Penn, Chief Executive Officer and President.

"The strong performance of Agency RMBS helped drive our results this quarter, and the recent decline in mortgage rates and corresponding increase in prepayment expectations boosted the value of the prepayment protection that our specified pools provide. In contrast, the generic pools that underlie TBAs tend to be more prepayment-sensitive. Because we concentrate our long investments in specified pools as opposed to TBAs, the increase in specified pool pay-ups further benefited our performance for the quarter.

"The year is off to a great start, and with interest rates low and prepayments likely to pick up from here, we believe that our portfolio is well positioned. Changes in the prepayment landscape should favor our core strengths of prepayment modeling, asset selection, and dynamic interest rate hedging, while also providing meaningful trading opportunities."

¹ Core Earnings and Adjusted Core Earnings are non-GAAP financial measures. Adjusted Core Earnings represents Core Earnings excluding the effect of the Catch-up Premium Amortization Adjustment on interest income. See "Reconciliation of Core Earnings to Net Income (Loss)" below for an explanation regarding the calculation of Core Earnings, Adjusted Core Earnings, and the Catch-up Premium Amortization Adjustment.

² Adjusted net interest margin represents net interest margin excluding the effect of the Catch-up Premium Amortization Adjustment on interest income.

³ The Company defines its net mortgage assets-to-equity ratio as the net aggregate market value of its mortgage-backed securities (including the underlying market values of its long and short TBA positions) divided by total shareholders' equity. As of March 31, 2019 the market value of the Company's mortgage-backed securities and its net short TBA position was \$1.492 billion and \$(152.3) million, respectively, and total shareholders' equity was \$158.2 million.

(1) Represents the dollar amount (not shown in thousands) per \$100 of current principal of the price or cost for the security.

(2) Excludes Agency IOs.

The Company's overall RMBS portfolio decreased by 3.1% to \$1.492 billion as of March 31, 2019, as compared to \$1.540 billion as of December 31, 2018. The Company's Agency RMBS portfolio turnover was 16% for the quarter, as compared to 22% in the prior quarter. The Company's total investment in non-Agency RMBS was \$11.2 million as of both March 31, 2019, and December 31, 2018.

The Company benefited from strong performance in its Agency RMBS portfolio this quarter. Declining interest rates and tightening yield spreads on many Agency RMBS generated net realized and unrealized gains on the Company's Agency assets. Additionally, outperformance of specified pools compared to TBAs, in the form of higher pay-ups for specified pools, also contributed to results, as the Company continued to concentrate its long investments in specified pools, as opposed to TBAs. Pay-ups are price premiums for specified pools relative to their TBA counterparts. Increasing prepayment expectations related to declining mortgage rates were the key drivers of the expansion in specified pool pay-ups. Average pay-ups on the Company's specified pools increased to 0.99% as of March 31, 2019, as compared to 0.58% as of December 31, 2018. Meanwhile, declining interest rates during the quarter led to losses on the Company's interest rate hedges, and these hedging losses partially offset the gains on the Company's assets. During the quarter the Company continued to hedge interest rate risk, primarily through the use of interest rate swaps, short positions in TBAs, U.S. Treasury securities, and futures.

The Company's non-Agency RMBS performed well during the quarter, driven by strong net interest income and net unrealized gains. Fundamentals underlying non-Agency RMBS remain strong, led by a stable housing market. To the extent that more attractive entry points develop in non-Agency RMBS, the Company may increase its capital allocation to this sector.

Core Earnings was lower this quarter as compared to the prior quarter, primarily as a result of a reversal in the direction of the Catch-up Premium Amortization Adjustment. With mortgage rates declining quarter over quarter, expected future prepayments increased, which caused a negative Catch-Up Premium Amortization Adjustment to interest income in the current quarter, as compared to a positive adjustment to interest income in the prior quarter. Adjusted Core Earnings was lower in the current quarter as compared to the prior quarter, primarily as a result of an increase in repo borrowing rates combined with a smaller portfolio, partially offset by increases in asset yields.

Reconciliation of Core Earnings to Net Income (Loss)

Core Earnings consists of net income (loss), excluding realized and change in net unrealized gains and (losses) on securities and financial derivatives, and, if applicable, items of income or loss that are of a non-recurring nature. Core Earnings includes net realized and change in net unrealized gains (losses) associated with payments and accruals of periodic payments on interest rate swaps. Adjusted Core Earnings represents Core Earnings excluding the effect of the Catch-up Premium Amortization Adjustment on interest income. The Catch-up Premium Amortization Adjustment is a quarterly adjustment to premium amortization triggered by changes in actual and projected prepayments on the Company's Agency RMBS (accompanied by a corresponding offsetting adjustment to realized and unrealized gains and losses). The adjustment is calculated as of the

beginning of each quarter based on the Company's then-current assumptions about cashflows and prepayments, and can vary significantly from quarter to quarter.

Core Earnings and Adjusted Core Earnings are supplemental non-GAAP financial measures. The Company believes that Core Earnings and Adjusted Core Earnings provide information useful to investors because they are metrics that the Company uses to assess its performance and to evaluate the effective net yield provided by the portfolio. Moreover, one of the Company's objectives is to generate income from the net interest margin on the portfolio, and Core Earnings and Adjusted Core Earnings are used to help measure the extent to which this objective is being achieved. In addition, the Company believes that presenting Core Earnings enables its investors to measure, evaluate and compare its operating performance to that of its peer companies. However, because Core Earnings and Adjusted Core Earnings are incomplete measures of the Company's financial results and differ from net income (loss) computed in accordance with GAAP, they should be considered as supplementary to, and not as substitutes for, net income (loss) computed in accordance with GAAP.

The following table reconciles, for the three-month periods ended March 31, 2019 and December 31, 2018, the Company's Core Earnings and Adjusted Core Earnings on a consolidated basis to the line on the Company's Consolidated Statement of Operations entitled Net Income (Loss), which the Company believes is the most directly comparable GAAP measure on its Consolidated Statement of Operations to Core Earnings:
