Item 2.02 Results of Operations and Financial Condition.

The information in this Item 2.02 and the disclosure incorporated by reference in Item 7.01 with respect to Exhibit 99.1 attached to this Current Report on Form 8-K are being furnished by Ellington Residential Mortgage REIT (the "Company") pursuant to Item 7.01 of Form 8-K in satisfaction of the public disclosure requirements of Regulation FD and Item 2.02 of Form 8-K, insofar as they disclose historical information regarding the Company's results of operations or financial condition for the quarter ended March 31, 2015.

On May 5, 2015, the Company issued a press release announcing its financial results for the quarter ended March 31, 2015. A copy of the press release is furnished herewith as Exhibit 99.1 to this Current Report on Form 8-K and is incorporated herein by reference.

In accordance with General Instructions B.2 and B.6 of Form 8-K, the information included in Item 2.02 and the disclosure incorporated by reference in Item 7.01 shall not be deemed "filed" for the purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or otherwise subject to the liabilities of that section, nor shall it be deemed incorporated by reference into any filing made by the Company under the Exchange Act or the Securities Act of 1933, as amended, except as shall be expressly set forth by specific reference in such a filing.

Item 7.01 Regulation FD Disclosure.

The disclosure contained in Item 2.02 is incorporated herein by reference.

Item 9.01 Financial Statements and Exhibits.

- (d) Exhibits. The following exhibit is being furnished herewith this Current Report on Form 8-K.
 - 99.1 Earnings Press Release dated May 5, 2015

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

99.1 Earnings Press Release dated May 5, 2015

Ellington Residential Mortgage REIT Reports First Quarter 2015 Results

OLD GREENWICH, Connecticut—May 5, 2015

Ellington Residential Mortgage REIT (NYSE: EARN) today reported financial results for the quarter ended March 31, 2015.

Summary of Financial Results

- Net income for the quarter was \$3.7 million, or \$0.40 per share, as compared to a net loss in the fourth quarter of \$1.2 million or \$0.13 per share.
- Core Earnings¹ for the quarter was \$6.0 million, or \$0.66 per share, as compared to \$7.0 million, or \$0.76 per share, in the fourth quarter of 2014.
- Book value decreased 0.8% to \$17.71 per share as of March 31, 2015 from \$17.86 per share as of December 31, 2014, after giving effect to a first quarter dividend of \$0.55 per share. Economic return on book value for the quarter was 2.2%.
- Net interest margin was 2.21%, as compared to 2.49% for the fourth quarter of 2014.
- Weighted average prepayment speed for the Agency RMBS portfolio was 6.3% CPR for the quarter, as compared to 4.6% in the fourth quarter.
- Dividend yield of 13.3% based on May 4, 2015 closing stock price of \$16.51.
- Debt-to-equity ratio was 7.5:1 as of March 31, 2015, as compared to 8.1:1 as of December 31, 2014.

First Quarter 2015 Results

"We are pleased to have generated net income of \$0.40 per share, core earnings of \$0.66 per share, and an economic return on book value of 2.2%, or 9.3% annualized, despite challenging and volatile market conditions during the first quarter. Heightened duration risk, prepayment risk, and government policy risk have set the theme so far in 2015, but thanks to disciplined risk management we delivered another solid quarter," said Laurence Penn, Chief Executive Officer and President.

"Our Agency portfolio performed well during the quarter and continues to be predominantly comprised of specified pools that we believe will be significantly less sensitive to prepayment increases than their generic counterparts. While refinancing activity was tame last year relative to the absolute level of mortgage rates, the surge in refinancing activity in January and early February served as a stark reminder that prepayment risk should not be underestimated. This development enhanced the value of our specified pools, as evidenced by the significant increase in our average pay-ups. The recent volatility has created numerous trading opportunities for us, and as a result, we actively traded our portfolio during the first quarter, generating net realized gains of \$6.7 million. Active trading remains a key component of our strategy, as does active hedging of our interest rate risk, and, consistent with prior quarters, short TBA positions represented a large portion of our interest rate hedges. We expect that specified pools will continue to outperform their generic pool, or TBA, counterparts over the near to medium term, and we remain positioned accordingly. Meanwhile, our relatively small non-Agency portfolio continues to perform well. While our core earnings for the quarter declined somewhat to \$0.66 per share as a result of the compression in asset yields, it still safely covers our quarterly dividend as well as our estimated quarterly taxable income."

As of March 31, 2015, our mortgage-backed securities portfolio consisted of \$1.264 billion of fixed rate Agency "specified pools," \$42.1 million of Agency RMBS backed by adjustable rate mortgages, or "Agency ARMs," \$44.1 million of Agency reverse mortgage pools, \$6.4 million of Agency interest only securities, or "Agency IOs," and \$31.7 million of non-Agency RMBS. Specified pools are fixed rate Agency pools with special characteristics, such as pools comprised of low loan balance mortgages, pools comprised of mortgages backed by investor properties, pools containing mortgages originated through the government-sponsored "Making Homes Affordable" refinancing programs, and pools containing mortgages with various other characteristics. During the quarter, we modestly increased our holdings of reverse mortgage pools while we decreased our holdings of Agency IOs. The size and composition of the remainder of our long bond portfolio, including our non-Agency portfolio, was comparable to that as of December 31, 2014. In addition, separate and apart from the short TBA portfolio that we hold for hedging purposes against our specified pools, we held \$92.9 million in notional amount of long TBA positions for investment purposes at March 31, 2015, up from \$68.3 million at December 31, 2014. For financial reporting purposes, TBAs are considered derivative instruments.

The first three months of 2015 were marked by significant interest rate volatility in the face of global economic weakness (especially in Europe and China) and uncertainty as to the timing of future Federal Reserve interest rate increases. The ten-year U.S. Treasury yield began the first quarter at 2.17%, fell as low as 1.64% mid-quarter, and ended the first quarter at 1.92%.

The average rate for a fixed-rate 30-year conventional mortgage also declined over the course of the quarter, dropping 0.17% to 3.70% as of March 31, 2015, after reaching as low as 3.59% mid-quarter. The decline in mortgage rates finally sparked

¹ Core Earnings is a non-GAAP financial measure. See "Reconciliation of Core Earnings to Net Income (Loss)" below for an explanation regarding the calculation of Core Earnings.

significantly greater refinancing activity, as the MBA Refinance Index surged in January. This was in marked contrast to the fourth quarter of 2014, when interest rates also dropped substantially, but refinancing activity was relatively muted. The recent reduction in FHA mortgage insurance premiums, which took effect in late January, also contributed to the increase in prepayment speeds, particularly for GNMA pools.

The combination of increased prepayment rates and reduced Federal Reserve support led to a drop in TBA roll prices and the overall underperformance of TBAs, especially higher coupon TBAs such as 30-year 4%'s and 4.5%'s, relative to interest rate swaps. Meanwhile, many specified pool sectors performed well in the quarter, as their favorable prepayment characteristics became more valuable in a higher prepayment environment, and as they became less expensive to hedge with TBAs given lower TBA roll prices. However, increases in prepayments were not consistent across coupon and issue year vintages. Many of the more recent vintage coupons showed very sharp increases in prepayment speeds while some more seasoned vintages were less reactive. As a result, the relative price movements of specified pools were not uniform and pay-ups for certain segments of the specified pool market appreciated greatly, while others were largely unchanged. Pay-ups are price premiums for specified pools relative to their TBA counterparts. However, notwithstanding the variation in pay-up appreciation across specified pool sectors, the weighted average pay-up for our specified pools increased significantly to 1.12% as of March 31, 2015 from 0.74% as of December 31, 2014.

As interest rates declined sharply during the first quarter, our long specified pool positions generated significant gains. Market volatility generally presents us with trading opportunities, particularly given our active style of portfolio management. As a result, our portfolio turnover for the quarter was 25% (as measured by sales and excluding paydowns), and we captured net realized gains of \$6.7 million.

Over the course of the first quarter, our interest rate hedges, which were largely concentrated in interest rate swaps and short TBA positions, generated losses that more than offset net realized and unrealized gains from our long portfolio. In the case of the hedging losses generated by our short TBA positions as opposed to our interest rate swaps, these losses were partially mitigated by the underperformance of TBA prices relative to specified pools (i.e., the outperformance of specified pool pay-ups), as well as by the drop in TBA roll prices (which kept down the cost of maintaining our short TBA positions). We believe that there remains a heightened risk of substantial interest rate and prepayment volatility in the near term, thus reinforcing the importance of our ability to hedge our risks using a variety of tools, including TBAs.

During the first quarter, we continued to focus our Agency RMBS purchasing activity primarily on specified pools, especially those with higher coupons. We also continued to be active in the reverse mortgage pool sector and purchased new issue reverse mortgage pools, which we continue to believe offer attractive relative value. Our Agency RMBS portfolio also includes a small allocation to Agency IOs. Despite the increase in prepayment activity in the first quarter, the market response in this sector was relatively subdued. Option-adjusted spreads on Agency IOs widened somewhat over the quarter, but not to a significant degree. During the quarter, we reduced our holdings of Agency IOs. However, with interest rates well below year end levels and with prepayment activity potentially poised to increase materially, we remain prepared to take advantage of possible dislocations in the Agency IO market.

We expect to continue to target specified pools that, taking into account their particular composition and based on our prepayment projections: (1) should generate attractive yields relative to other Agency RMBS and U.S. Treasury securities, (2) should have less prepayment sensitivity to government policy shocks, and/or (3) create opportunities for trading gains once the market recognizes their value, which for newer pools may come only after several months, when actual prepayment experience can be observed. We believe that our research team, proprietary prepayment models, and extensive databases remain essential tools in our implementation of this strategy.

Our net Agency premium as a percentage of our long Agency RMBS holdings is one metric that we use to measure our overall prepayment risk. Net Agency premium represents the total premium (excess of market value over outstanding principal balance) on long Agency RMBS holdings less the total premium on related net short TBA positions. The lower our net Agency premium, the less we believe we are exposed to market-wide increases in Agency RMBS prepayments. As of March 31, 2015, our net Agency premium as a percentage of fair value on long Agency RMBS holdings was approximately 4.7% as compared to 4.0%, as of December 31, 2014. Excluding TBA positions used to hedge our long Agency RMBS portfolio, our Agency premium as a percentage of fair value was approximately 7.7% and 6.9% as of March 31, 2015 and December 31, 2014, respectively. These percentages may fluctuate from period to period based on market factors, including interest rates and mortgage rates, as well as with respect to the net percentages, the degree to which we hedge prepayment risk with short TBAs. We believe that our focus on purchasing pools with specific prepayment characteristics provides a measure of protection against prepayments.

During the first quarter, non-Agency RMBS continued to exhibit price stability relative to the broader financial markets. The non-Agency RMBS market continues to be supported by favorable technical conditions, most notably the absence of a new issue market, as well as the relative dearth of higher-yielding U.S. fixed income assets generally. On the fundamental side, modestly increasing home prices and overall improvements in mortgage delinquency and foreclosure rates continue to support

non-Agency RMBS valuations. Nevertheless, we believe that many non-Agency RMBS assets remain mispriced, thus highlighting the importance of careful loan-level analysis performed on a security-by-security basis. As of March 31, 2015, our investment in non-Agency RMBS was \$31.7 million as compared to \$32.5 million as of December 31, 2014.

For the quarter ended March 31, 2015, net realized gains and change in net unrealized gains (losses) on our mortgage-backed securities were \$11.9 million, or \$1.30 per share. Our RMBS generally increased in value during the first quarter. Net realized losses and change in net unrealized gains (losses) on our derivatives were \$(15.8) million, or \$(1.73) per share, and were principally attributable to the decline in interest rates over the quarter.

For the quarter ended March 31, 2015, the annualized weighted average yield of our portfolio of Agency and non-Agency RMBS was 3.14%, while our average cost of funds including interest rate swaps was 0.93%, resulting in a net interest margin for the quarter of 2.21%. In comparison, for the quarter ended December 31, 2014, the annualized weighted average yield of our Agency and non-Agency RMBS was 3.43%, while the average cost of funds including interest rate swaps was 0.94%, resulting in a net interest margin of 2.49%. The decrease in our portfolio yield was primarily a function of the decline in yields of Agency RMBS, affecting securities held and securities purchased. Our cost of repo increased 0.02% to 0.36% for the first quarter, and the weighted average remaining maturity of our repo borrowings increased to 68 days as of March 31, 2015, up from 60 days as of December 31, 2014. Our interest rate swap costs declined as interest rates fell and the weighted average maturity of our swaps declined. Our interest income is also subject to fluctuations based on adjustments to premium amortization as a result of changes in prepayments of our Agency RMBS (accompanied by a corresponding offsetting adjustment to realized and unrealized gains and losses). During the first quarter, this "catch-up amortization adjustment," decreased interest income by \$0.4 million, while in the fourth quarter it increased interest income by \$0.2 million. The amount of this adjustment can vary significantly from quarter to quarter.

After giving effect to a first quarter dividend of \$0.55 per share, our book value per share was \$17.71 as of March 31, 2015, a 0.8% decrease from our book value per share as of December 31, 2014 of \$17.86. Our economic return on book value for the first quarter was 2.2%. Economic return on book value is computed by adding back dividends to ending book value per share, and comparing that amount to book value per share as of the beginning of the quarter.

For the quarter ended March 31, 2015, Core Earnings was \$6.0 million, or \$0.66 per share, and for the quarter ended December 31, 2014, Core Earnings was \$7.0 million, or \$0.76 per share. Core Earnings is a non-GAAP financial measure. Compression in asset yields was the principal driver of our quarter over quarter decline in Core Earnings. See "Reconciliation of Core Earnings to Net Income (Loss)" below for an explanation regarding the calculation of Core Earnings.

Mortgage-backed securities

The following table summarizes our portfolio of mortgage-backed securities as of March 31, 2015 and December 31, 2014:

		December 31, 2014													
(In thousands)	Current Principal	Fair Value	Average Price ⁽¹⁾			verage Cost ⁽¹⁾	Current Principal			Fair Value	Average Price ⁽¹⁾			Cost	Average Cost ⁽¹⁾

Total TBA securities, net	\$	(508,837)	\$	(547,951)	\$	(549,246)	\$	(1,295)	\$	(536,757)	\$	(574,589)	\$	(575,787)	\$	(1,198)	

We primarily use TBAs to hedge interest rate risk, typically in the form of short positions. However, from time to time we also invest in TBAs as a means of acquiring exposure to Agency RMBS, or for speculative purposes, including holding long positions. Overall, we typically hold a net short position.

The following tables detail gains and losses on our financial derivatives for the three month periods ended March 31, 2015 and December 31, 2014:

		Three Month Period Ended March 31, 2015

Notional amount represents the principal balance of the underlying Agency RMBS. Cost basis represents the forward price to be paid for the underlying Agency RMBS.

Market value represents the current market value of the underlying Agency RMBS (on a forward delivery basis) as of the respective period end.

Net carrying value represents the difference between the market value of the TBA contract as of the respective period end and the cost basis, and is reported in Financial derivatives-assets, at fair value and Financial derivatives-liabilities, at fair value on the Consolidated Balance Sheet, for each respective period end.

Three Month Period Ended December 31, 2014

Interest Rate Sensitivity

The following table summarizes, as of March 31, 2015, the estimated effects on the value of our portfolio, both overall and by category, of immediate downward and upward parallel shifts of 50 basis points in interest rates.

	Estimated Change in Fair Value ⁽¹⁾								
(In thousands)		50 Basis Point Decline in Interest Rates	50 Basis Point Increase in Interest Rates						
Agency RMBS - ARM Pools	\$	276	\$	(397)					
Agency RMBS - Fixed Pools and IOs		20,123		(26,714)					
TBAs		(5,342)		8,807					
Non-Agency RMBS		386		(370)					
Interest Rate Swaps		(14,770)		13,923					
Swaptions		474		(403)					
U.S. Treasury Securities		(2,431)		2,320					
Repurchase and Reverse Repurchase Agreements		(911)		1,151					
Total	\$	(2,195)	\$	(1,683)					

⁽¹⁾ Based on the market environment as of March 31, 2015. Results are based on forward-looking models, which are inherently imperfect, and incorporate various simplifying assumptions. Therefore, the table above is for illustrative purposes only and actual changes in interest rates would likely cause changes in the actual value of the overall portfolio that would differ from those presented above and such differences might be significant and adverse.

Repo Borrowings

The following table details our outstanding borrowings under repo agreements as of March 31, 2015 and December 31, 2014:

			March 31, 2015			December 31, 2014				
			Weighted	Average		Weighted Average				
Remaining Days to Maturity		orrowings utstanding	Interest Rate	Remaining Days to Maturity	Borrowings Outstanding	Interest Rate	Remaining Days to Maturity			
	(In thousands)			(In thousands)					
30 days or less	\$	412,648	0.34%	15	\$ 437,633	0.33%	15			
31-60 days		274,524	0.34	45	417,009	0.34	44			
61-90 days		269,022	0.36	74	333,580	0.36	72			
91-120 days		50,066	0.38	105	_	_	_			
151-180 days		139,513	0.43	168	85,917	0.41	165			
301-330 days		65,337	0.47	227	48,941	0.47	317			
Total	\$	1,211,110	0.36%	68	\$ 1,323,080	0.35%	60			

As of March 31, 2015, we had no outstanding borrowings other than under repo agreements. Our repo borrowings were with nine counterparties as of March 31, 2015 and were entirely related to Agency RMBS. The above figures are as of the respective quarter ends; over the course of the quarters ended March 31, 2015 and December 31, 2014 our average cost of repo was 0.36% and 0.34%, respectively.

Other

We incur an annual base management fee, payable quarterly in arrears, in an amount equal to 1.50% of shareholders' equity (as defined in our management agreement, effective January 1, 2015). For the quarter ended March 31, 2015, our expense ratio, defined as management fees and operating expenses as a percentage of shareholders' equity, was 3.5% on an annualized basis.

Dividends

On March 11, 2015, our Board of Trustees declared a first quarter dividend of \$0.55 per share, or \$5.0 million, which was paid on April 27, 2015 to shareholders of record on March 31, 2015.

Share Repurchase Program

On August 13, 2013, our Board of Trustees approved the adoption of a \$10 million share repurchase program. The program, which is open-ended in duration, allows us to make repurchases from time to time on the open market or in negotiated transactions. Repurchases are at our discretion, subject to applicable law, share availability, price and our financial performance, among other considerations. To date, we have not repurchased any shares under the program.

Reconciliation of Core Earnings to Net Income (Loss)

Core Earnings consists of net income (loss), excluding realized and change in net unrealized gains and losses on mortgage-backed securities and financial derivatives, and, if applicable, items of income or loss that are of a non-recurring nature. Core Earnings includes net realized and change in net unrealized gains (losses) associated with payments and accruals of periodic payments on interest rate swaps. Core Earnings is a supplemental non-GAAP financial measure. We believe that Core Earnings provides information useful to investors because it is a metric that we use to assess our performance and to evaluate the effective net yield provided by the portfolio. Moreover, one of our objectives is to generate income from the net interest margin on the portfolio, and Core Earnings is used to help measure the extent to which this objective is being achieved. However, because Core Earnings is an incomplete measure of our financial results and differs from net income (loss) computed in accordance with GAAP, it should be considered as supplementary to, and not as a substitute for, net income (loss) computed in accordance with GAAP.

The following table reconciles, for the three month periods ended March 31, 2015 and December 31, 2014, our Core Earnings on a consolidated basis to the line on our Consolidated Statement of Operations entitled Net Income (Loss), which we believe is the most directly comparable GAAP measure on our Consolidated Statement of Operations to Core Earnings:

	Three Month Period Ended	Three Month Period Ended
(In thousands except share amounts)	March 31, 2015	December 31, 2014
Net Income (Loss)	\$ 3,677	\$ (1,176)
Less:		
Net realized gains on mortgage-backed securities	6,722	3,070
Net realized losses on financial derivatives, excluding periodic payments(1)	(8,036)	(9,280)
Change in net unrealized gains (losses) on mortgage-backed securities	5,186	11,000
Change in net unrealized gains (losses) on financial derivatives, excluding accrued periodic payments $^{(2)}$	(6,243)	(12,942)
Subtotal	 (2,371)	(8,152)
Core Earnings	\$ 6,048	\$ 6,976
Weighted Average Shares Outstanding	 9,149,274	 9,149,274
Core Earnings Per Share	\$ 0.66	\$ 0.76

⁽¹⁾ For the three month period ended March 31, 2015, represents Net realized gains (losses) on financial derivatives of \$(8,743) less Net realized gains (losses) on periodic settlements of interest rate swaps of \$(707). For the three month period ended December 31, 2014, represents Net realized gains (losses) on financial derivatives of \$(12,923) less Net realized gains (losses) on periodic settlements of interest rate swaps of \$(3,643).

⁽²⁾ For the three month period ended March 31, 2015, represents Change in net unrealized gains (losses) on financial derivatives of \$(7,094) less Change in net unrealized gains (losses) on accrued periodic settlements of interest rate swaps of \$(851). For the three month period ended December 31, 2014, represents Change in net unrealized gains (losses) on financial derivatives of \$(11,217) less Change in net unrealized gains (losses) on accrued periodic settlements of interest rate swaps of \$1,725.

About Ellington Residential Mortgage REIT

Ellington Residential Mortgage REIT is a mortgage real estate investment trust that specializes in acquiring, investing in and managing residential mortgageand real estate-related assets, with a primary focus on residential mortgage-backed securities, for which the principal and interest payments are guaranteed by a U.S. government agency or a U.S. government-sponsored enterprise. Ellington Residential Mortgage REIT is externally managed and advised by Ellington Residential Mortgage Management LLC, an affiliate of Ellington Management Group, L.L.C.

Conference Call

We will host a conference call at 11:00 a.m. Eastern Time on Wednesday, May 6, 2015, to discuss our financial results for the quarter ended March 31, 2015. To participate in the event by telephone, please dial (877) 437-3698 at least 10 minutes prior to the start time and reference the conference ID number 27375412. International callers should dial (810) 740-4679 and reference the same conference ID number. The conference call will also be webcast live over the Internet and can be accessed via the "For Our Shareholders" section of our web site at www.earnreit.com. To listen to the live webcast, please visit www.earnreit.com at least 15 minutes prior to the start of the call to register, download, and install necessary audio software. In connection with the release of these financial results, we also posted an investor presentation, that will accompany the conference call, on its website at www.earnreit.com under "For Our Shareholders—Presentations."

A dial-in replay of the conference call will be available on Wednesday, May 6, 2015, at approximately 2:00 p.m. Eastern Time through Wednesday, May 13, 2015 at approximately 11:30 p.m. Eastern Time. To access this replay, please dial (800) 585-8367 and enter the conference ID number 27375412. International callers should dial (404) 537-3406 and enter the same conference ID number. A replay of the conference call will also be archived on our web site at www.earnreit.com.

Cautionary Statement Regarding Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve numerous risks and uncertainties. Actual results may differ from our beliefs, expectations, estimates, and projections and, consequently, you should not rely on these forward-looking statements as predictions of future events. Forward-looking statements are not historical in nature and can be identified by words such as "believe," "expect," "anticipate," "estimate," "project," "plan," "continue," "intend," "should," "would," "could," "goal," "objective," "will," "may," "seek," or similar expressions or their negative forms, or by references to strategy, plans, or intentions. Examples of forward-looking statements in this press release include, without limitation, our beliefs regarding the current economic and investment environment, our ability to implement our investment and hedging strategies, our future prospects and the protection of our net interest margin from prepayments, volatility and its impact on us, the performance of our investment and hedging strategies, our exposure to prepayment risk in our Agency portfolio, estimated effects on the fair value of our RMBS and interest rate derivative holdings of a hypothetical change in interest rates, statements regarding our share repurchase program, and statements regarding the drivers of our returns. Our results can fluctuate from month to month and from quarter to quarter depending on a variety of factors, some of which are beyond our control and/or are difficult to predict, including, without limitation, changes in interest rates and the market value of our securities, changes in mortgage default rates and prepayment rates, our ability to borrow to finance our assets, changes in government regulations affecting our business, our ability to maintain our exemption from registration under the Investment Company Act of 1940 and other changes in market conditions and economic trends. Furthermore, forward-looking statements are subject to risks and uncertainties, including, among other things, those described in Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2014 filed on March 12, 2015 which can be accessed through the link to our SEC filings under "For Our Shareholders" on our website (www.earnreit.com) or at the SEC's website (www.sec.gov). Other risks, uncertainties, and factors that could cause actual results to differ materially from those projected may be described from time to time in reports we file with the SEC, including reports on Forms 10-Q, 10-K and 8-K. We undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.
